Spanish (Native)

English (Intermediate)

## 👤 ABOUT ME

I am a passionate **web developer** with experience in **designing** and **developing applications** and **websites**. My main focus is on the **frontend**, where I have worked on creating engaging and functional user interfaces.

Additionally, **I love self-learning** and staying up to date with the latest trends and technologies in the world of web development. I am always eager to take on **new challenges** and contribute **creative solutions** to the projects I am involved in.

## 💼 WORK EXPERIENCE

### Donicus

(July 2023 - January 2025)

- Designed and developed a reservation management platform using **Figma** (design), **Nuxt** and **Pinia** (frontend state management), and **MySQL** (backend), optimizing tour and activity management for providers and travelers.
- Redesigned a **mobile app** for guides with Flutter, simplifying administrative tasks and **enhancing the user experience**.
- Created and maintained **websites** using the company's **Vue** and **CMS**, ensuring attractive and functional designs as well as regular updates
- Collaborated with **cross-functional teams to improve existing systems**, implementing enhancements based on client and user feedback
- Researched and integrated **new technologies**

### Singular Factory

(March 2023 - June 2023)

- Updated an existing application, incorporating new features using **HTML**, **SCSS**, **Tailwind CSS**, **TypeScript**, and **Vue.js**
- Coordinated with **cross-functional teams** for the development of large-scale projects
- Developed and **documented code** using **Git**, ensuring scalability and maintainability of projects
